MILLIONTOKEN.ORG

A NEW STANDARD

A Million Token (MM) is a social media-driven decentralized cryptocurrency with a fixed supply of 1,000,000 tokens each with a pegged minimum value of \$1 (USDC) with its value increasing with scarcity. Each token can be sold in fractional amounts, up to 18 decimal digits.

These hybrid characteristics results in a deflationary digital asset that can be used as an alternative store of wealth, a new digital gold standard.

Million Token is at the forefront of crypto's third wave (the first being Bitcoin, the second being Ethereum/Dogecoin proof-of-work). Benefitting from the learnings of prior projects, Million is fully adapted to the future of the DeFi ecosystem leveraging next-gen Proof-of-Stake (PoS) technology across multiple blockchains.

The token was founded by YouTuber TechLead (Patrick Shyu) and launched on the Ethereum blockchain as an ERC-20 token on July 1, 2021¹; the project was audited by Certik Blockchain Security on July 30, 2021² within the same month of its creation.

MILLIONTOKEN.ORG

The Web 3 Social Token for Millionaires by Millionaires.

PROJECT PILLARS

As the first in the next-generation of Web 3 (Web 3.0) social tokens, Million is one of the leading, most influential and most valuable digital currencies in the crypto spectrum that addresses shortcomings of prior cryptocurrencies:

- The transaction speed limitations of the current leader Bitcoin³.
- Issues that have hindered the Ethereum blockchain: restrictively high gas fees, failed transactions, slow speeds.
- Teething problems with other coins: Cardano's unreadiness, Solana's outages and security issues, Dogecoin's lack of smart-contract capabilities.
- Lack of transparency in founders, source code, and distributions in other cryptocurrencies.
- Limitations of being on single blockchains that may not support smart-contract capability, NFTs, staking features, higher transaction speeds, low-cost fees, and scalability due to antiquated technologies & proof-of-work systems.

It overcomes these issues via the token's project pillars:

1. Transparency
2. Built-in rarity

3. <https://towardsdatascience.com/the-blockchain-scalability-problem-the-race-for-visa-like-transaction-speed-5cce48f9d44>

MILLIONTOKEN.ORG

3. Blockchain agnostic
4. Community driven
5. Web 3 ready
6. Social relevance

Read on to learn more about these core pillars.

**Be brave.
Choose life.
Buy Million.**

MILLIONTOKEN.ORG

1. TRANSPARENCY

One of the biggest issues with cryptocurrencies is that their founders are obscured in anonymity, they lack transparency. Million is a cryptocurrency with a public face. Its creator, ex-Google / ex-Facebook TechLead, is a recognized YouTuber⁴ and influencer with over 1 million followers. He is part of a transparent community whose plans and progress are communicated through its website and all main social media platforms in a democratized manner.

TechLead (Patrick Shyu⁵) along with working as a Tech Lead at Google and Facebook also worked for various social and technology companies like Groupon and Sony Pictures Imageworks as a software engineer. He has extensive entrepreneurial experience creating and developing social networks, apps, games and courses via a series of successful internet businesses.

Now TechLead is showing the world his mastery of the crypto and emerging Web 3 space, that Million Token is in competent hands, evident in his expert dissection of the Squid Game token scam⁶ and continued development of Million Token.

MILLIONTOKEN.ORG

Percentage Diamond Hands - October 22, 2021⁷

2. BUILT-IN RARITY

As cryptocurrencies become part of the future of the global financial system as FIAT currency increasingly becomes devalued, with fears of hyperinflation, people are looking for alternative long-term stores of and growth of their wealth. Million fits this requirement perfectly as a deflationary digital asset.

TOKEN DETAILS

| | |
|------------------------|--|
| Token Name | Million Token |
| Token Symbol | MM |
| Total Supply | 1,000,000 |
| Token Type | ERC20 Token |
| Token Main Blockchain | Ethereum |
| Decimals | 18 |
| Smart Contract Address | 0x6B4c7A5e3f0B99FCD83e9c089BDDD6c7FCe5c611 |

As a next-generation DeFi coin and fast growing brand, Million will ultimately replace older technologies like Bitcoin as cryptocurrency's new standard of digital gold. As a sizable portion of holders appreciate, being in the project for the long term – "diamond hands" on above graph.

Million will achieve this due to its fixed supply of 1,000,000 tokens, each with a pegged minimum value of \$1 (USDC). The price cannot go below 1 USDC due to a Liquidity Wall where each million token is backed by 1 USDC on Uniswap⁸ on the Ethereum blockchain. Each

7. <https://dune.xyz/queries/100130>

8. <https://app.uniswap.org/#/pool/69951>

MILLIONTOKEN.ORG

token can be sold in fractional amounts, up to 18 decimal digits. The upside is unlimited, as unlike traditional stablecoins where more coins are created due to demand, pegging their value to U\$1, Million has a fixed supply and therefore has an unbound maximum.

As demand grows its value increases with scarcity as no more than 1 million tokens will ever be minted. Compared to other projects 1 million tokens is at the lower end of cryptocurrency volume, resulting in rapid price growth from demand. As Million gains popularity and circulation, it can potentially reach higher values, potentially being worth as much as 10 or 100 million per token.

MILLION POOL STAKING

Million Pool

Stake your Million tokens to earn even more Million tokens.

A percentage of founding tokens are used to fund pool rewards. For more information, visit the [Million Discord](#).

 **Million Pool (MM/MM)**

Deposit

| | |
|-----------------|------------------|
| Total deposited | \$6,078,497.99 |
| Pool rate | 874.33 MM / week |
| APY | 18.40 % |

Million Pool App ([DApp](#) / [Analytics](#))

Million Pool allows staking Million Tokens (on the Ethereum network) to earn more Million Tokens – up to **20% APY**. A percentage of founding tokens are used to fund the pool rewards. This provides an incentive and bonus to long-term holders of Million, as the token increases in value, stakers receive additional tokens increasing the worth of their holdings in Million.

As Million prides itself on transparency, the Million Pool [code](#) and Uniswap staking (forked) [code](#) are open source and viewable online.

MILLIONTOKEN.ORG

3. BLOCKCHAIN AGNOSTIC

Million Token is blockchain agnostic. While initially launched on Ethereum (as an ERC-20 token), it has already been ported to Binance Smart Chain, Polygon, Kusama, Avalanche, Solana, and Harmony blockchains with more to follow as a multi-chain currency.

TOKEN BRIDGES

| | |
|---------------------------|---|
| Ethereum (Main) | 0x6B4c7A5e3f0B99FCD83e9c089BDDD6c7FCe5c611 |
| Binance Smart Chain - BSC | 0xBF05279F9Bf1CE69bBFEd670813b7e431142Afa4 |
| Polygon | 0x5647Fe4281F8F6F01E84BCE775AD4b828A7b8927 |
| Solana | 2PoF4qqWq97yJk276yUYaGVkkASE7tqAU7H5faEBkeC |
| Avalanche | 0x993163CaD35162fB579D7B64e6695cB076EF5064 |
| Kusama | 0x95bf7E307BC1ab0BA38ae10fc27084bC36FcD605 |
| Harmony One | one1rv4uy6plsklmn3x6p6pj9432yzuhe7raz8fk60 |

This versatility is a key quality of Million, allowing it to not only be accessible through more exchanges & markets, but to also benefit from the technological strengths of each diverse blockchain; such as almost **\$0 gas transaction fees** on Polygon (MATIC).

These bridges are built upon the Ethereum implementation that was audited by Certik Blockchain Security (July 2021). An audit is an extensive methodical examination and analysis of a smart-contract's code that is used to interact with a cryptocurrency or blockchain. Conducted primarily to discover security vulnerabilities. A project that has been security audited is a project that you can trust.

CRYPTONAUT – First-person crypto space-shooter ([Itch.io](https://itch.io))

4. COMMUNITY DRIVEN

In the weeks that followed Million's launch, an energetic decentralized community rapidly formed around it as it quickly evolved into a burgeoning social token.

The strength of the community is key to the token's success: anyone can join and contribute to the Million ecosystem, Million operates through a 100% decentralized governance DAO with voting rights based on token holding weight, and, the community can participate in providing DeFi liquidity pools for Million.

ECOSYSTEM

As a 100% decentralized community, Million supports a diverse ecosystem of projects including online communities, digital art and NFTs, social marketing, products, metaverse, gaming, merchandise and even Million's own branded coffee. As the DeFi space continues to evolve, Million draws on the community's proven technical expertise, a diverse and growing ecosystem of: software engineers, developers, digital artists, marketers, entrepreneurs, crypto analysts and enthusiasts looking to collaborate and socialize.

As well as a source of creative ideas, the growing community is simultaneously an audience and marketplace for projects to grow. And now with Million [Launchpad](#), a platform for crypto projects to

MILLIONTOKEN.ORG

gain higher growth through the Million community, members are able to stake Million Tokens to earn your project tokens as rewards.

There are no set requirements as to what can become part of the Million ecosystem: the scope of the projects is limited only by the community's imagination and continues to adapt to cutting-edge technologies. The community and ecosystem is still young and only just getting started.

GOVERNANCE

Million established a decentralized [governance](#) platform through which token holders gain ownership and voting rights to the Million community. As a 100% decentralized community DAO, Million has diversified into an ecosystem of projects and contributing entrepreneurs.

Additionally, admins of the primary Discord are required to hold a minimum number of tokens to ensure a stakeholding interest in the well-being of the community.

LIQUIDITY POOLS

The Million token price cannot go below 1 USDC due to a Liquidity Wall where each million token is backed by 1 USDC on Uniswap⁹ on the Ethereum blockchain.

The community can participate in the Million Token ecosystem by providing Liquidity¹⁰ on various services: [Uniswap V3](#) on Ethereum (ETH), [QuickSwap](#) on Polygon (MATIC), [PancakeSwap](#) on Binance Smart Chain (BSC), [Raydium](#) on Solana (SOL), [TraderJoe](#) on Avalanche (AVAX), and, [Moonriver](#) on Kusama (KSM).

Participation in liquidity pool generates fees payable to providers, another source of wealth creation for the Million community. We have also partnered with Quickswap in order to provide impressive staking returns to those providing liquidity¹¹ on the MATIC network.

MILLIONTOKEN.ORG

5. WEB 3 READY

Million is a next-gen Web 3 (or Web 3.0) social token and meme-coin. Unlike older coins (like Dogecoin), Million exists as a social token launched on Ethereum and ported to multiple other blockchains for versatility, lower transaction fees, faster speeds, and scalability. As a multi-chain coin, Million leverages technologies from a variety of blockchain networks to support full Web 3 smart-contracts including: NFTs, staking, farming, and the metaverse.

Left [AlienWizard](#), middle [BlueGuyTheArtGuy](#), right [CocoaTails](#)

The token is supported by its global following: a brand representing its community's multifaceted talent base, strength, diversity, and creative spirit. Within the first months of the project's existence, numerous custom NFT's have already been launched and traded on the OpenSea platform. Million has attracted leading digital artists to

MILLIONTOKEN.ORG

its community. As the global digital art market gains traction, Million is perfectly positioned to support and benefit from this dynamic new sector. Unlike first-generation cryptocurrencies, Million is built to support smart-contract capabilities like NFTs, staking, and the metaverse – [Lion Run](#) (logo and NFT art above), an NFT metaverse for the Million community.

SOCIAL TOKENS WILL DISRUPT INDUSTRIES

It is important to consider Million Token within the context of the current crypto market place. Social tokens are on the rise: The CEO of RealVision and former Goldman Sachs executive Raoul Pal went on TheDefiant podcast in July 2021¹² discussing this emerging sector in cryptocurrency.

"[I] took some macro bets on the future of where this is all going including communities and social tokens," Pal commented.

According to Pal, in the near future, businesses will soon be centering their efforts around communities. They will be driving their own value systems through social tokens, and benefitting from the network effects of those systems. He used Disney as an example in the above podcast to demonstrate how cryptocurrency can disrupt that business and give them more direct relationships to their fans and community.

"Let's say you are Disney, how many fans does Disney have?... A billion people, maybe two, maybe three?" he speculated. "That token becomes the currency of the Disney world. You build a whole economy around Disney. If the community becomes more valuable... culture becomes an asset you can invest in."

Pal also pointed out that the social tokens industry will move from a billion dollar business to a trillion dollar business over the next five or ten years. Million Token is perfectly positioned to take advantage of this new movement.

Social is powerful. It is the only element that can drive exponential growth, seen in the rapid rise of social-media networks.

MILLIONTOKEN.ORG

6. SOCIAL RELEVANCE

Million has a luxury brand as a social-meme coin, however, to describe it merely as this would be to fail to see how it resonates with the zeitgeist of our times. Million doesn't represent luxury, but rather, Million represents freedom. This is the Million brand.

With COVID has come what some refer to as the Great Resignation¹³. COVID has given people the opportunity stop and reflect upon what they wish to do with their lives, given you only get the one. This has resulted for one reason or another, in many resigning from their jobs or planning to do so for a brighter future.

It shouldn't come as a surprise that many do not value the prospect of working most of their adult life so as to finally be able to retire at the age of 65. This will likely be unattainable for most, and retiring in your 70s the more likely scenario. People are questioning whether they want to wait until they retire, once the best part of their lives have been spent working in jobs they hate, so as to be able to start doing what they want in order to live fulfilling lives.

Depending on where you live, average life expectancy ranges from 75 to 85 years¹⁴. Million represents an opportunity to gain financial independence sooner (within years), rather than later. Freedom to live your life as you want, freedom to work when and how you want, on what you want. Freedom to make your dreams a reality.

MILLIONTOKEN.ORG

MILLION ROARMAP

As the Million community grows, the iconic logo gains in popularity with it. It is becoming a globally recognized and accepted symbol of wealth, status and financial independence. To that end we have an aggressive roarmap (roadmap) to achieve this and in a short time have made great strides, completing many with more in the works.

Cub Phase:

- Building The Community
- BSC Network Integration (bridged)
- Exchange Listings (Gate.io, ZTB)
- Strategic Partnership With AnySwap
- Record Breaking Launch to Influencers

Mane Phase:

- Smart Contract Audit by Certik
- Launch On Polygon Network
- Launch On Solana Network
- Launch On Kusama Network

MILLIONTOKEN.ORG

- Launch On Avalanche AVAX
- Staking of Million Tokens
- Decentralized Governance
- Million NFT Metaverse
- Collaboration With Influencers
- More Exchange Listings
- NFT Collaboration With Digital Artists
- Partnerships With Other Projects

Pride Phase:

- Be Listed On ALL Major Chains/Networks
- Onboarding Other Projects To Integrate MM
- Partnership with Celebrity Influencers
- Surpass gold to become the defi standard
- Collaboration with Fortune 500 Brands
- Jacuzzi Bar Super Party - 1 Billion Market Cap

CHOOSE LIFE

What if you knew about Bitcoin in 2011 when it was U\$1, would you have bought Bitcoin not knowing that it would reach (as of writing) almost U\$70,000 and a projected U\$100,000 by end of 2021? What if you did know that it would reach such heights, but all you had to do, was buy early and HODL (not sell)? What if you were told that there was a new Bitcoin, a new store of value and deflationary asset. That along with protecting and growing your wealth in the face of hyperinflation, that one day it could potentially be worth more than Bitcoin due to its limited and fixed supply. Would you buy it?

Now what if unlike with Bitcoin, which was the lone relatively unknown pioneer of cryptocurrencies, you did not have to wait a decade before being able to achieve financial independence, and that Million has the tokenomics to achieve this for you within a few years. That you could start living your life as you want to, sooner, rather than having your time waste away. Would you buy it then?

There comes a time in your life, when you need to seize opportunity, when you need to be brave in the face of growing uncertainty. These opportunities wait for no one and, tend to come once in a lifetime.
